SET DIAGRAM

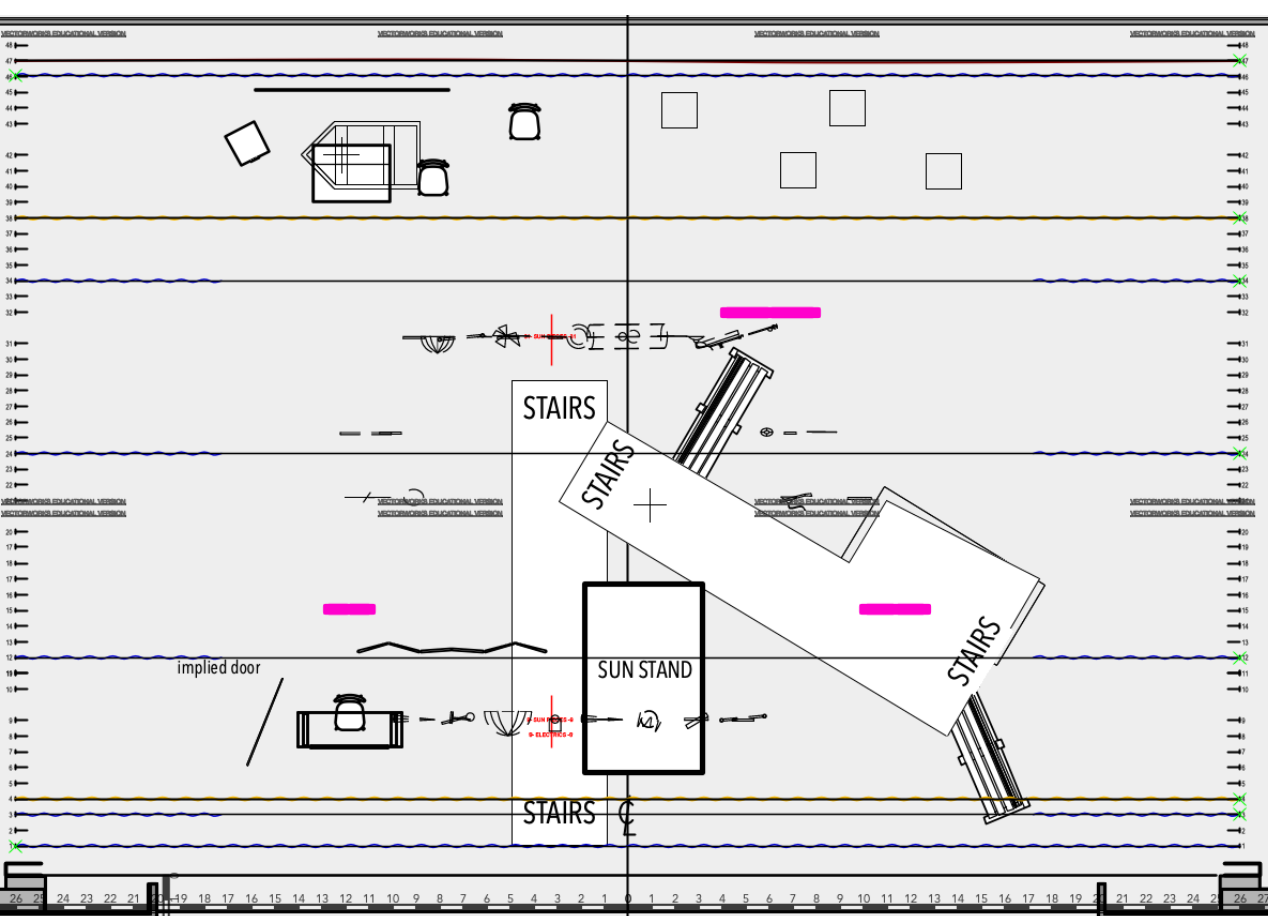

Full spectrum color mixing
 The broadest, most evenly distributed spectrum of colors in one self-contained color mixing system. This means there is no need for complicated module changes or doubling up fixtures on the truss in order to achieve a total range of colors.

The temperature of light
 All around us in nature, the temperature of light is in continuous flux. It is never constant. The subtle shifts of color temperature throughout the day gently communicate with our peripheral senses. We receive subconscious messages such as: the storm is clearing, midday is approaching or the workday is ending. In theatre, the ability to accurately emulate color temperature can similarly communicate to an audience all the emotions associated with an exact moment in time. The incredible accuracy of the CMY mixing system in the MAC TW1 allows you to do just this.

Color Wheel Details		Interchangeable Gobo Detail	Rotating Gobo Details
Shape	Interchangeable wedge	Outside Diameter	30 mm (1.18 in)
Materials	1.1 mm glass Borofloat	Image Diameter	25 mm (0.98 in)
		Materials	0.5 mm aluminum 1.1 mm glass Borofloat
		Outside Diameter	30 mm (1.18 in)
